YouTube Marketing Plan

Channel: **AI Build Lab** — Real projects, built by a beginner, with AI.

Digital Marketing Track — Task Report

Submitted by: Reddi Malli Nandini

Tools: YouTube, Google Trends, Canva

1. Objective

To learn video marketing and YouTube optimization basics by creating a complete content strategy for a new YouTube channel, covering video topics, SEO-friendly titles, thumbnail concepts, keywords, descriptions and a publishing schedule.

2. Channel Strategy

Item	Detail
Channel name	AI Build Lab
Niche	AI-assisted coding and project building for engineering students
Target audience	B.Tech / engineering students in India (18-23) who want portfolio projects, internships and hackathon wins but feel they lack coding experience
Language	English with light Hinglish
Goal	Reach 1,000 subscribers and 4,000 watch hours in 6 months by solving searched problems (tutorials) and building trust (personal build stories)

Content pillars

Pillar	Covers	Growth driver
Build Tutorials	Step-by-step builds of real apps using AI tools	Search traffic
Student Career	Portfolio, resume, internships, hackathons	Search + suggested
Build Stories	Honest wins and failures from my own projects	Subscribers / trust

3. Keyword Research Method

• **YouTube autocomplete:** typing seed terms into YouTube search to collect real search suggestions.
• **Google Trends:** comparing keywords with the 'YouTube Search' filter, region India, past 12 months; keeping steady or rising terms.
• **Competitor check:** reviewing top-ranking videos for each keyword to find gaps (outdated, too long, too advanced).
• **One primary keyword per video:** used in the title, first description line, tags, and spoken in the first 30 seconds.

#	Primary keyword	Secondary keywords
1	build app with ai	ai coding for beginners, full stack project, no code experience
2	best ai coding tools	ai for coding, claude vs chatgpt coding, ai code assistant
3	ai projects for students	final year project ideas, resume projects, btech project ideas
4	portfolio website with ai	developer portfolio, personal website tutorial, ai website builder
5	git and github for beginners	github tutorial, how to use github, git commands
6	deploy website for free	vercel tutorial, host website free, deploy react app
7	how to prompt ai for coding	prompt engineering for coding, ai coding tips, better ai prompts
8	hackathon tips	hackathon for beginners, how to win hackathon, hackathon project
9	smart india hackathon	sih 2026, sih preparation, sih problem statement
10	full stack developer job	how to get internship as student, developer job for freshers, btech internship

4. 10 Video Ideas & SEO-Friendly Titles

Title rules: primary keyword near the start, under ~60 characters where possible, clear benefit or curiosity hook, number/year when relevant.

#	Video idea	SEO title	Pillar / Format
1	My journey: building a full stack app with zero coding experience using AI	**I Built a Full Stack App With AI (Zero Coding Experience)**	Build Stories Long (12-15 min)
2	Best AI coding tools compared for beginners	**Best AI Coding Tools for Beginners in 2026 (Honest Comparison)**	Build Tutorials Long (10-12 min)
3	Project ideas students can build with AI for their resume	**7 AI Projects for Students That Actually Impress Recruiters**	Student Career Long (10 min)
4	Build a portfolio website in one hour using AI	**Build a Portfolio Website With AI in 1 Hour (Step by Step)**	Build Tutorials Long (15 min)
5	Git and GitHub basics for absolute beginners	**Git & GitHub for Beginners in 10 Minutes (Simple Explanation)**	Build Tutorials Medium (10 min)
6	Deploy any project for free online	**How to Deploy Your Website for FREE (Vercel Tutorial 2026)**	Build Tutorials Medium (8-10 min)
7	Prompting tips to get better code from AI	**How to Prompt AI to Write Better Code (7 Tips That Work)**	Build Tutorials Medium (8 min)
8	Lessons from losing a hackathon	**I Lost a Hackathon - Here's What I Learned**	Build Stories Long (10 min)
9	Complete beginner guide to Smart India Hackathon preparation	**Smart India Hackathon 2026: Complete Preparation Guide**	Student Career Long (12 min)
10	How a 2nd-year student landed a full stack engineer role	**How I Got a Full Stack Developer Job in 2nd Year (No Degree Yet)**	Student Career Long (12 min)

Shorts plan: each long video is cut into 2 Shorts posted 1-2 days later, linking to the full video.

5. Thumbnail Concepts

Rules: 3-4 words of text max, one face with clear emotion, high contrast, readable on mobile, matches the title's promise. Size 1280x720 px, designed in Canva.

#	Title	Concept
1	I Built a Full Stack App With AI (Zero Coding Experience)	Split screen: left 'Day 1' blank VS Code, right finished app on laptop. Me pointing, surprised face. Text: 'ZERO -> APP'. Colors: dark navy bg, neon green text.
2	Best AI Coding Tools for Beginners in 2026 (Honest Comparison)	4 laptop screens with chat windows, a gold crown with a question mark above them. Me with thinking face. Text: 'WHICH ONE?'. Colors: white bg, orange accents.
3	7 AI Projects for Students That Actually Impress Recruiters	Resume paper with 7 glowing project cards popping out. Text: '7 RESUME PROJECTS'. Colors: blue bg, yellow text.
4	Build a Portfolio Website With AI in 1 Hour (Step by Step)	Timer showing '1:00:00' next to a clean portfolio site mockup. Text: '1 HOUR SITE'. Colors: purple gradient, white text.
5	Git & GitHub for Beginners in 10 Minutes (Simple Explanation)	Simple branch diagram (3 coloured dots joined by lines) + '10 MIN' badge. Text: 'GIT MADE EASY'. Colors: black bg, white + green.
6	How to Deploy Your Website for FREE (Vercel Tutorial 2026)	Rocket launching from laptop, 'FREE' price tag. Text: 'GO LIVE FREE'. Colors: black bg, white rocket, red tag.
7	How to Prompt AI to Write Better Code (7 Tips That Work)	Before/after: messy red code vs clean green code with a chat bubble in between. Text: 'BAD vs GOOD PROMPT'. Colors: dark bg, red/green.
8	I Lost a Hackathon - Here's What I Learned	Me with disappointed face holding a trophy with a big red X, small text 'Rejected'. Text: 'WHAT WENT WRONG?'. Colors: grey bg, red accent.
9	Smart India Hackathon 2026: Complete Preparation Guide	Indian tricolor stripe on side, team of 6 icons, calendar. Text: 'SIH ROADMAP'. Colors: white bg, saffron/green accents.
10	How I Got a Full Stack Developer Job in 2nd Year (No Degree Yet)	Me in a formal shirt, laptop showing an offer-style email (blurred). Text: '2ND YEAR -> DEV JOB'. Colors: navy bg, gold text.

6. Video Descriptions

Structure: keyword-rich hook in the first 2 lines -> chapters -> resources -> related video -> subscribe CTA -> keywords -> 3 hashtags.

1. I Built a Full Stack App With AI (Zero Coding Experience)

Can you build a real full stack app without knowing how to code? I tried it with AI tools and here's exactly what happened - the prompts, the bugs, and the final working app. Whether you're a first-year student or switching careers, this shows what AI can (and can't) do for beginners.
Keywords: build app with ai, ai coding for beginners, full stack project, no code experience *Hashtags:* #buildappwithai #AIBuildLab #BTech

2. Best AI Coding Tools for Beginners in 2026 (Honest Comparison)

I tested popular AI coding assistants on the same beginner project to see which one actually helps you learn and ship. I compare code quality, explanations, speed and price so you can pick the right tool for your first project.
Keywords: best ai coding tools, ai for coding, claude vs chatgpt coding, ai code assistant *Hashtags:* #bestaicodingtools #AIBuildLab #BTech

3. 7 AI Projects for Students That Actually Impress Recruiters

Stuck on what to build for your resume? Here are 7 AI project ideas for B.Tech and engineering students - from beginner to advanced - with the tech stack, difficulty level, and what recruiters notice in each one.
Keywords: ai projects for students, final year project ideas, resume projects, btech project ideas *Hashtags:* #aiprojectsforstudents #AIBuildLab #BTech

4. Build a Portfolio Website With AI in 1 Hour (Step by Step)

Every student developer needs a portfolio. In this tutorial I build one from scratch with AI in under an hour - design, code, and live on the internet - and share the prompts so you can do the same today.
Keywords: portfolio website with ai, developer portfolio, personal website tutorial, ai website builder *Hashtags:* #portfoliowebsitewithai #AIBuildLab #BTech

5. Git & GitHub for Beginners in 10 Minutes (Simple Explanation)

Git and GitHub confuse almost every beginner. In 10 minutes I explain repos, commits, branches and push - with a live demo - so you can upload your first project to GitHub with confidence.
Keywords: git and github for beginners, github tutorial, how to use github, git commands *Hashtags:* #gitandgithubforbeginners #AIBuildLab #BTech

6. How to Deploy Your Website for FREE (Vercel Tutorial 2026)

Built a project but it only runs on your laptop? I show how to deploy it for free so anyone can open it with a link - including connecting GitHub, environment variables and fixing the most common deployment errors.
Keywords: deploy website for free, vercel tutorial, host website free, deploy react app *Hashtags:* #deploywebsiteforfree #AIBuildLab #BTech

7. How to Prompt AI to Write Better Code (7 Tips That Work)

AI gives bad code when you give it bad prompts. These 7 practical prompting habits - context, examples, small steps, asking for tests and more - will make your AI-written code cleaner and easier to debug.
Keywords: how to prompt ai for coding, prompt engineering for coding, ai coding tips, better ai prompts *Hashtags:* #howtopromptaiforcoding #AIBuildLab #BTech

8. I Lost a Hackathon - Here's What I Learned

My hackathon project got rejected. Instead of hiding it, I'm breaking down what we built, what judges likely looked for, and the 5 changes I'd make next time - so you don't repeat my mistakes.

Keywords: hackathon tips, hackathon for beginners, how to win hackathon, hackathon project *Hashtags:* #hackathontips #AIBuildLab #BTech

9. Smart India Hackathon 2026: Complete Preparation Guide

Planning to participate in Smart India Hackathon? This guide covers forming a team, choosing a problem statement, building your idea and preparing for the internal round and presentation - from a student who has gone through it.

Keywords: smart india hackathon, sih 2026, sih preparation, sih problem statement *Hashtags:* #smartindiahackathon #AIBuildLab #BTech

10. How I Got a Full Stack Developer Job in 2nd Year (No Degree Yet)

I'm still in my 2nd year of B.Tech and I'm already working as a full stack engineer. Here's the exact path - projects, GitHub, LinkedIn and applications - and what I'd do if I was starting again today.

Keywords: full stack developer job, how to get internship as student, developer job for freshers, btech internship *Hashtags:* #fullstackdeveloperjob #AIBuildLab #BTech

7. Publishing Calendar

Two long videos per week, Tuesday and Saturday at 6:00 PM IST (after college hours). Shorts on Thursday and Sunday.

Week	Date	Day	Video	Pillar
1	2026-11-03	Tue	I Built a Full Stack App With AI (Zero Coding Experience)	Build Stories
1	2026-11-07	Sat	Git & GitHub for Beginners in 10 Minutes (Simple Explanation)	Build Tutorials
2	2026-11-10	Tue	7 AI Projects for Students That Actually Impress Recruiters	Student Career
2	2026-11-14	Sat	Build a Portfolio Website With AI in 1 Hour (Step by Step)	Build Tutorials
3	2026-11-17	Tue	Best AI Coding Tools for Beginners in 2026 (Honest Comparison)	Build Tutorials
3	2026-11-21	Sat	How to Deploy Your Website for FREE (Vercel Tutorial 2026)	Build Tutorials
4	2026-11-24	Tue	I Lost a Hackathon - Here's What I Learned	Build Stories
4	2026-11-28	Sat	How to Prompt AI to Write Better Code (7 Tips That Work)	Build Tutorials
5	2026-12-01	Tue	Smart India Hackathon 2026: Complete Preparation Guide	Student Career
5	2026-12-05	Sat	How I Got a Full Stack Developer Job in 2nd Year (No Degree Yet)	Student Career

Workflow per video: Day 1 research & script -> Day 2 record -> Day 3 edit + thumbnail -> Day 4 scheduled upload with full metadata.

8. Optimization Checklist

- Keyword in title, description, tags and intro
- Custom thumbnail
- Chapters
- 3 hashtags
- End screen and cards
- Playlist per pillar
- Pinned comment with a question
- Captions checked
- Cross-promotion on LinkedIn, Instagram, WhatsApp groups

9. KPIs

Metric	Target (3 months)	Why
CTR	5%+	Tests thumbnail + title
Avg. view duration	40%+	Tests hook & content
Subscribers	500	Audience growth
Watch hours	1,500	Monetization progress
Search traffic share	30%+	Tests keyword strategy

10. Key Learnings

- Titles and thumbnails work as a pair: the thumbnail stops the scroll, the title gives the reason to click.
- Search-based topics bring steady views; personal stories build loyal subscribers.
- A consistent schedule matters more than posting volume.
- Analytics (CTR, retention) show what to improve next.
